

Mobile Security Services

Most intruder alarms that go off are false but some are not. Either way who would you want to be there to find out?

response 24hr

Mobile Security Services

Alliance Mobile Security's Response capability provides a flexible range of Security services that can protect people, property and assets day or night every day of the year.

These can be used as part of a wider Security solution or as a stand-alone service according to your Security needs. Alliance Mobile Security Ltd provides Mobile Security services to a range of companies of varying size and from different industries.

Mobile Security services have a number of advantages:

- They are more affordable than dedicated manned guarding and allow organisations - smaller companies in particular - to reap the benefits of having a professional Security presence
- They help to maintain a deterrent value by providing a visible Security presence
- A mobile service can also provide a swift reactive capability in the event of an incident

Our Mobile Security services consist of:

- Mobile Patrols
- Lock ups/unlocks
- Accompanied visits
- Sign & Response

Mobile Patrols

Mobile Security patrols can provide a deterrent to criminal and other adverse activity while providing a swift reactive service should an incident occur.

Uniformed Security Officers visit, patrol and undertake agreed duties on client premises to an agreed schedule.

Mobile patrols also have the potential for a range of added value soft Facilities Management services such as:

- Out of hours Fire system testing
- Checks on fire extinguishers
- Intruder Alarm Management
- Conference room preparation
- Auditing a company's clear desk policy

Mobile patrols can also be undertaken for residential properties while the homeowner is away for an extended period of time.

Lock ups/unlocks

Scheduled

This is a service where a property is unlocked and locked up at a scheduled time each day - including out of hours times such as weekends. It is particularly useful for companies who cannot dedicate one of their own employees to unlock and lock up the property each and every day it is required.

On demand

On demand lock-ups and unlocks are useful for companies that prefer to have their keys held securely but have staff who need to gain access or to leave a building at irregular times.

Similarly this service is useful for companies who may have contractors that need to gain access to the property out of normal working hours.

Lock outs

As keyholders we have the ability to assist our clients who have locked themselves out of their property.

Sign & Response

On some occasions the display of Security signage only may be requested. This can be made available along with a response service should we be notified of any adverse activity.

Alliance uses satellite vehicle tracking on its fleet of vehicles. This means we can provide Quality Assurance in the service we provide through

patrol activities being recorded and it also contributes to the Health & Safety of our people.

Alliance Mobile Security is inspected for Mobile Security services by the Security Industry Authority to Approved Contractor level. All Security personnel are vetted in accordance with BS 7858 and will be licensed in the regulated environment in accordance with the Private Security Industry Act, 2001.
