

Service Portfolio

At Alliance we are committed to keeping you and the interests of your property safe. This information represents some of our more sophisticated capabilities.

Solutions for Total Security

At Alliance we are committed to keeping you and the interests of your company safe and we offer the following range of services to achieve that aim.

At Alliance we draw upon our broad expertise to offer a flexible, solutions approach to meet both the security requirements and needs of our residential & commercial customers.

While many of the services we deliver are reactive based, responding to alarm activations, lockouts, 'on demand' unlocks/locks we also have the capability to provide long term scheduled services.

Our team of Mobile Patrol Officers and Unlock/Lock Officers can be scheduled to deliver mutually agreed services such as;

- Weekday unlocks and/or lockups
- Void property inspections
- Internal/external patrols
- Holiday patrols
- Daily CCTV tape changing
- Weekly fire alarm testing

The services we undertake are not limited to our services guide. Should you have a need for a service then please make us aware of your requirements.

Due to the restricted geographical area of our service which endeavours to assure a good level of service we do have partnerships in place in neighbouring counties for the same or similar services.

Keyholding & Alarm Response

Alliance Mobile Security operates a Keyholding & Alarm response service for both commercial and residential properties. Our specially trained Officers will respond to alarm activations day or night, every day of the year.

Keyholding & Alarm response is open to all types of audible and communicating alarm systems. Monitored alarm systems & speech dialers are able to remotely communicate and notify a potential incident. Audible alarm systems can have systems in place such as immediate neighbours being informed of our service and given a 24hrs telephone number to call. Likewise security site boards or more discreet window stickers can be used to inform the police or attending friends or family that Alliance could be contacted to attend.

Mobile Security Patrols

Mobile Security patrols can provide a deterrent to criminal and other adverse activity while providing a swift reactive service should an incident occur. Uniformed Security Officers visit, patrol and undertake agreed duties on client premises to an agreed schedule.

Mobile patrols also have the potential for a range of added value soft Facilities Management services such as:

- Out of hours Fire system testing
- Intruder Alarm Management
- Conference room preparation
- Auditing a company's clear desk policy

Mobile Unlock/Lock Services

When it comes to the end of the day who locks up your building? The last employee out? Or may be the cleaner? Alliance Mobile Security can provide a service where you can be assured the building will be unlocked or locked in an agreed way every working day.

Holiday Patrols

Should you be away from your home for an extended period of time holiday patrols may give you the peace of mind that your home is being looked after. The patrols can be an inspection of the grounds only or can be extended to an internal patrol of the house to check for obvious maintenance problems.

Sign & Response

A low cost service that brings assurance that someone will be contacted on your behalf and able to respond and act in your best interest. The sign & response service provides signage only to a property to display and in the event of an incident Alliance Mobile Security, if notified would attend equipped with instructions to call-out friends, family or even contractors.

Accompanied Visits

Both commercial & residential customers may want to continue using their existing friends, family or employees to attend alarm activations.

The appointed person does not have to attend alone. By subscribing to the Accompanied service our trained and licensed Patrol Officer can meet with your keyholder and attend the property together until such a time as the keyholder is happy to continue alone or until the incident has been closed.

For more information on our services please contact us on 01372 362213 or email us at info@alliancemobilesecurity.co.uk
